

Nurturing Nature™

Block Botanical Gardens is an astonishing collection of superbly grown palms and other tropical plants, many of them rare and unusual, luxuriating on a relatively small site to form a sensational assemblage of form and colour.

Dr. Jeff Block has collected together a fascinating array of special plants, but **more than anything it is the supreme standard of horticulture and the resulting beauty of the specimen plants that will impress the visitor.**

Dr. John Dransfield, 2015 The World's foremost palm expert
Royal Botanical Gardens, Kew; Co-Editor – PALMS
